Question 5: Student Marks Table

Create an HTML page titled **Student Marks List**.

Requirements:

1. Create a table with the columns Roll No., Name, HTML, CSS, JavaScript, Total, and Percentage.
2. Insert records for five students.
3. Use the following marks:

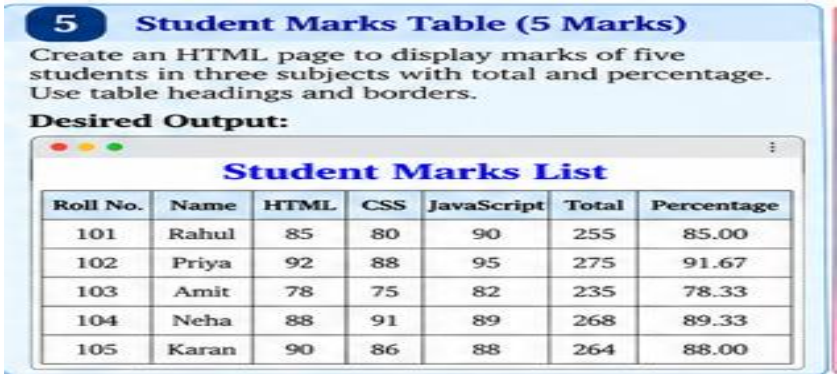

Roll No.	Name	HTML	CSS	JavaScript
101	Rahul	85	80	90
102	Priya	92	88	95
103	Amit	78	82	85
104	Neha	88	91	89
105	Karan	90	86	88

4. Calculate the total marks for each student out of 300.
5. Calculate the percentage for each student.
6. Use table headings and borders.
7. Display the title "Student Marks List" above the table.

Formula:

Percentage = (Total Marks / 300) × 100

Desired Output

A bordered student marks table displaying all five students, their subject-wise marks, total marks, and percentages.

HTML concepts: `<table>`, `<caption>`, `<tr>`, `<th>`, `<td>`, and `border`.

Note: Calculate totals and percentages manually before entering them into the table. JavaScript is not permitted.
